

Giraffes

Read the text and answer the following questions!

Hello friends! Lift your head up a little. Here I am! Yes, I'm a little tall. I am the tallest of the land animals. Did you like my spots? These spots are unique to each giraffe, just like your fingerprints. They don't resemble each other at all. Our height varies between 4-6 meters. Our weight can approach 2 tons. In the African Continent of the world, we live in savannas, grasslands and open forests. We are generally found in areas with acacia trees. Kenya and Zimbabwe are at the top of the regions where we live the most.
